

UNI-SPOTTER Stud Welders

UNI-SPOTTER Deluxe

UNI-SPOTTER 9000 Deluxe

A superior stud welding kit for the professional body man who wants the best. The 9190 welder in this kit has the most powerful transformer on the market and will keep operating efficiently in all kinds of high demand situations such as multiple users or low voltage source found at the end of a long extension cord.

Complete kit packaged in our 5529 custom-molded toolbox.

5 YEAR LIMITED WARRANTY

All Uni-Spotter stud welders are 110 volt, and come with a built-in overload relay to protect the transformer from overheating. Triggers are mounted in the handles for easy operation.

ALL WELDERS FEATURE
STUD EASE TECHNOLOGY
EXCLUSIVE TO UNI-SPOTTER!

DK1000 DENT KILLER

Dent Pulling Attachment for All UNI-SPOTTER Stud Welders

- Works great to restore body lines
- Works with all UNI-SPOTTER Stud Welders
- Quick and easy to use
- Lightweight and portable for out-of-position pulls

The Dent Killer is welded to the panel surface using a UNI-SPOTTER Stud Welder.

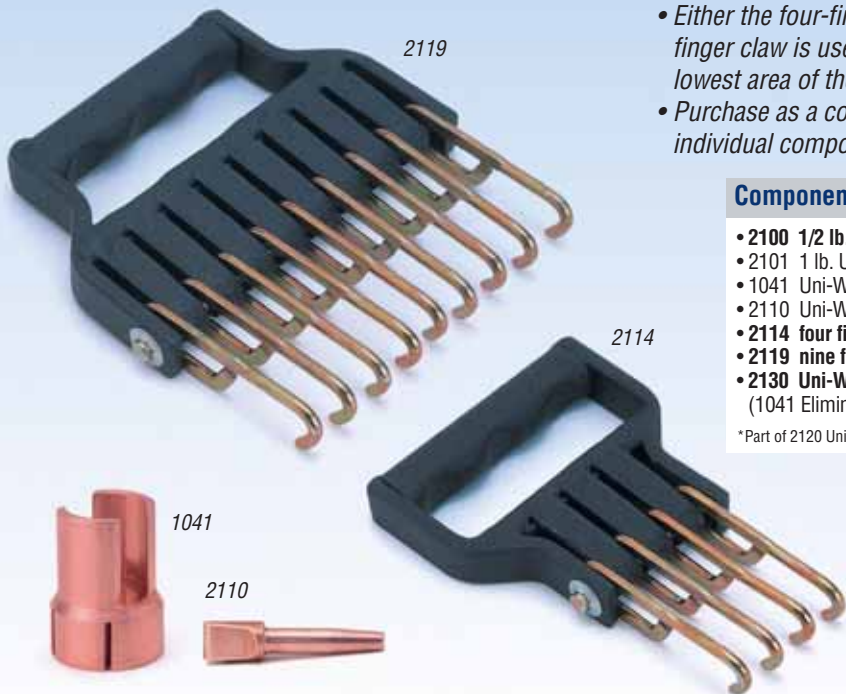

The dent is levered out using only the required amount of pull to leave a flat surface. The Dent Killer is then rotated around the weld to release the electrode, leaving a flat, workable surface.

Upgrade your **UNI-SPOTTER Stud Welder to a Studless Lever Action Dent Puller**

UNI-WIRE Pulling System

Designed for creases and larger damaged areas
Fits all UNI-SPOTTER Stud Welders

- The Uni-Wire is cut to length and a UNI-SPOTTER stud welder is used to weld it in place.
- Either the four-finger, or the nine-finger claw is used to pull the lowest area of the dent first.
- Purchase as a complete kit, or as individual components.

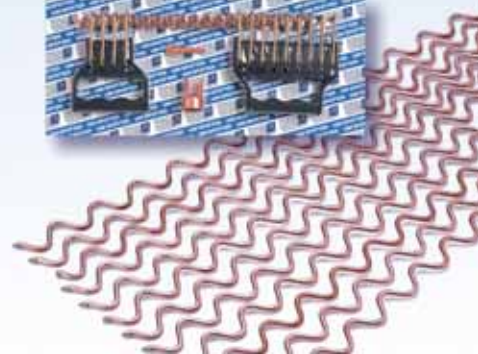

Components:

- 2100 1/2 lb. Uni-Wire bundle*
- 2101 1 lb. Uni-Wire bundle
- 1041 Uni-Wire Eliminator body
- 2110 Uni-Wire welding tip
- 2114 four finger Uni-Claw*
- 2119 nine finger Uni-Claw*
- 2130 Uni-Wire conversion kit* (1041 Eliminator & 2110 tip)

*Part of 2120 Uni-Wire Deluxe Kit

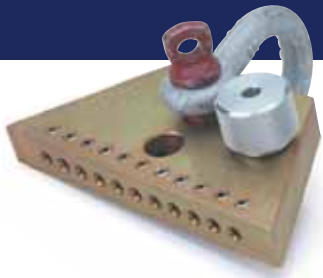

2120 Uni-Wire Deluxe Kit

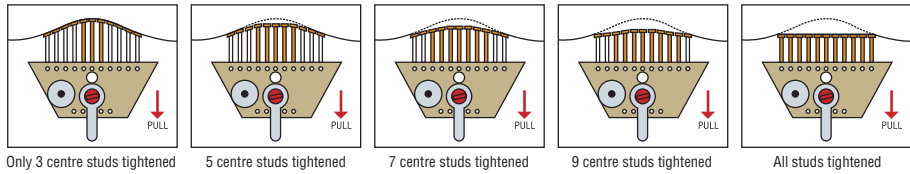

2100
